Flagtronics is a component system for drivers to enhance their situational awareness. The Flagtronics system will be used to transmit flag conditions to in-car units and to communicate driver safety alert information back and forth with race control. Participants are required to utilize the Flagtronics system for this event. Flagtronics is used as an advisory for local conditions (for example - debris, local yellow, slow-moving vehicle), however during Full Course condition situations drivers will adhere to the more restrictive flag condition (for example – Flagtronics show FCY, Corner Flag station is green. Flagtronics/FCY takes precedence) (for example - Flagtronics shows yellow, Corner Flag station shows red. Corner Flag/red takes precedence.) Flagtronics information can be used as a basis for rules enforcement, and a driver may provide such data in their defense in a protest or steward's action. It is highly recommended that the Flagtronics unit be located within the in-car-camera view.
